GoMarket

The prediction markets platform built for the world's most **opinionated** audience.

Being right should pay.

Prediction markets reward knowledge — not leverage, not luck. If you understand geopolitics or crypto better than the market, you profit.

Polymarket proved millions of people want this.
$24.5 billion in volume in 2025.

We're building what comes next.

Polymarket is built for the West.
The rest of the world is waiting.

- 300M+ Untapped Russian speaking users
- 400% growth in predictions markets from 2024-2025
- Polymarket: $1.4M CFTC fine, US blocked

> The gap is real. The timing is now. That's GoMarket.

Trade. Resolve. Access.

Trade

Real order books on crypto, geopolitics, and macro — markets worth having an opinion on.

Resolve

An oracle system built for contested information. Designed for markets where the truth is disputed by state actors.

Mobile App

Mobile Native. Embedded wallets. No MetaMask required. Feels like a consumer app.

The CIS crypto community is the ideal prediction market audience.

Information edge is real

Geopolitical and macro knowledge asymmetry creates genuine trading opportunities.

The culture already exists

High-conviction macro bets happen daily on Telegram; we're formalizing it.

Distribution is relationships

1,500+ KOLs onboarded through Thriv3 — zero paid ads — powered by 20+ years of marketing expertise driving real, scalable growth.

High-conviction markets worth trading.

Will BTC surpass $120K before the next halving?

YES NO

Will a Solana ETF be approved in 2025?

YES NO

Will Russia and Ukraine sign a ceasefire by Dec 31?

YES NO

Will the Ruble weaken past 100 to the USD by Q3?

YES NO

Will the Weather in Moscow reach 28°F tomorrow?

YES NO

Will Telegram launch a native DEX in 2025?

YES NO

EVERY MARKET SCORED ON 5 DIMENSIONS BEFORE LISTING. IF IT DOESN'T CLEAR THE BAR, IT DOESN'T GO LIVE.

Three problems that kill prediction market platforms.

Cold start — no liquidity, no traders	Protocol-owned seed liquidity + KOL-anchored positions on launch
Oracle disputes — who decides what's true?	Tiered sources, credentialed proposers, expert arbitration panel
Onboarding drop-off — wallets kill conversion	Embedded wallets, session keys, gas abstraction — approve once, trade silently

Six layers. Each one a real engineering problem.

Frontend	Next.js, real-time order book, mobile-first
Backend Infra	PostgreSQL + Redis, WebSocket feeds, chain indexer
Wallet & Onboarding	Embedded wallets, ERC-4337 session keys, USDC on-ramp
Oracle System	Multisig v1 → UMA Optimistic Oracle v2
Matching Engine	Hybrid CLOB — off-chain order book, on-chain settlement
Smart Contracts	Trustless settlement — USDC collateral, YES/NO tokens, audited payouts

We know what to build and what to buy.

We build

- Matching engine
- Resolution logic
- Order signing
- Chain indexer
- Ops tooling

We outsource

- Wallets → Privy / Dynamic
- Gas → Gelato
- Contracts base → Gnosis CTF
- Oracle base → UMA
- On-ramp → Moonpay

Most teams get this backwards. Over-engineer the contracts, under-build the exchange. **We won't.**

Testnet in 16 weeks. Mainnet in 6 months.

Contracts · Matching Engine · Wallets + Oracle · Frontend · Testnet · Audit · **Mainnet**

$100K–$250K seed liquidity committed

$100K–$200K audit budget ring-fenced

Gas float for sponsored transactions

7+ Liquidity and spread providers

The foundation is built. Now we build the infrastructure.

Done

- Market design framework
- Oracle architecture
- Liquidity strategy
- 300+ KOL relationships
- Full technical specification
- Legal analysis underway

→ What's next

- MVP launch & Testing
- GTM Strategy & Rollout
- Parlay Sports System
- Oracle & News partners
- Mainnet launch

Roadmap

PHASE 1

Foundation

Q1 2026

- Core platform live
- Team and operations in place
- Market framework and product scope defined
- Liquidity and market maker partnerships secured

PHASE 2

Launch

Q2 2026

- Mainnet launch with curated opening markets
- Parlays live in time for FIFA World Cup 2026
- Referral program launched
- Liquidity staking introduced
- Community and KOL activation

PHASE 3

Growth

Q3 2026

- Expanded market categories and deeper functionality
- Token farming program launched
- Eastern Europe market entry
- Increased liquidity depth and market maker coverage

PHASE 4

Scale

Q4 2026+

- Multi-region expansion
- Decentralized oracle integration
- Community-driven market creation
- Advanced trading features and incentive programs

Team

Tural K.

Co-Founder

Crypto-native marketing strategist and ecosystem builder with hands-on experience across 20+ Web3 projects, specializing in KOL acquisition, growth campaigns, and launch execution.

Nicholas J.

Co-Founder

Crypto investor and growth operator with 7+ years in Web3. Scaled memecoins to $500M+ valuations via KOL-led growth across TRON and Sui. Built a Telegram mini-app driving user acquisition.

Zamir K.

Head of Operations

Operations leader with 12+ years building systems that scale. Led 30+ token launches, managed $200M+ portfolio, and built operational frameworks from PE to Web3.

King Advisory

Head of Marketing

Advisor and growth operator with 10+ years in marketing and corporate sales. Focused on driving revenue and closing high-value deals.

Davey K.

Andrea I.V.

Category proven. Geography wide open.
Timing is now.

Proven model

Polymarket: $24.5B volume, category validated, blueprint exists.

Open market

300M+ untapped users, no serious competitors for CIS region, distribution in place.

Right moment

The window between "proven" and "crowded" in prediction markets is months, not years.

GoMarket

Building the future prediction market for the world's most opinionated audience.
